EXPERIENCE

Estate92.com - *Full Stack Developer*

APRIL 2022 - PRESENT

As a Full Stack Developer at Estate92.com, I am responsible for developing the company's Real Estate ERP. My daily tasks involve writing code for the front-end and back-end, building mobile applications, collaborating with the team on code reviews and pair programming, debugging and troubleshooting issues, maintaining and improving existing software systems, working with designers and project managers to deliver projects on time, providing technical guidance and mentorship, and participating in agile development methodologies. I also use PostgreSQL as the database management system and AWS and Heroku for cloud hosting and deployment.

I have a number of accomplishments that I am proud of in my role as a Full Stack Developer. I have successfully implemented a new feature that improved the user experience, led the development of a new mobile application, improved the performance and scalability of the Estate92 ERP, and mentored junior developers to help them develop their skills.

One of the challenges I have faced as a Full Stack Developer is debugging a critical issue that was causing the system to crash repeatedly. This required extensive troubleshooting and collaboration with the team. I have also had to manage and prioritize many tasks and modules of the system in a fast-paced environment, as well as communicate technical concepts and ideas to non-technical stakeholders in a clear and concise manner.

Freelancer - *Full Stack Developer*

AUGUST 2016 - PRESENT

As a Freelance Consultant with 7 years of experience in React, React Native, TypeScript, AWS, Azure, Laravel, Python, and Django, I bring a wealth of knowledge and expertise to the table. I'm able to provide valuable insights and solutions to clients in a range of industries, helping them to achieve their business goals and improve their operations. As a freelancer, I have the flexibility to take on a variety of projects and work with a range of clients, allowing me to constantly learn and grow in my career. My strong work ethic, attention to detail, and ability to deliver high-quality work on time make me a valuable asset to any organization. As a Freelance Consultant, I'm able to make a positive impact on businesses and organizations, helping them to succeed and thrive.

HA-Technologies Private Limited - *Chief Technology Officer*

DECEMBER 2018 - APRIL 2022

As the CTO of HA-Technologies, my role involves overseeing the technical direction of the company and managing a team of developers and other technical staff. Some of my day-to-day activities include setting up and scheduling meetings with the team or clients, collaborating with the technical team, reviewing code, and defining project scope and timelines. I also work closely with the finance team to manage budgets and forecast revenue.

I am proud of the numerous accomplishments I have achieved in my role as CTO. I have successfully implemented an agile development process that increased team productivity by 25%, launched a successful software product, and oversaw the development of a new mobile application. Additionally, I have made significant improvements to the company's technical infrastructure, which has allowed us to effectively complete deliverables.

One of the challenges I have faced as CTO is managing and leading a large, cross-functional team. It can be challenging to balance the needs of multiple stakeholders, including clients, investors, and the development team, while also managing budgets and resources effectively. However, I am committed to overcoming these challenges and working to ensure that our projects are delivered on time and to the required standards.

Leads360 Private Limited - *Full Stack Developer*

NOVEMBER 2017 - DECEMBER 2018

As a full-stack developer, my responsibilities include collaborating with a team of back-end and front-end developers under the guidance of the CTO. My specific duties include assisting with functional requirements, designing and developing user interactions on web pages, creating servers and databases, optimizing applications for mobile devices, and ensuring responsiveness. I also work with graphic designers to integrate design elements into web applications, and I am involved in all stages of a project, from conception to completion. Additionally, I have experience designing and developing APIs.

In terms of accomplishments, I am proficient in multiple programming languages and have a strong understanding of front-end and back-end technologies. I also have experience with version control and debugging tools. One of my strengths is my ability to solve complex problems.

Some challenges I have faced in this role include managing both front-end and back-end development, working with a variety of technologies, and testing and debugging code.

SEOISB - *Web Developer*

AUGUST 2016 - OCTOBER 2017

As a web developer, my primary duties involve meeting with clients to understand their needs and preferences for a website, and then coding and testing the site using HTML, XML, and other programming languages. I also work with designers to determine the layout and appearance of the site and integrate audio, video, and graphics as needed. In addition, I am responsible for quality testing and troubleshooting the website in various browsers to ensure it is functioning properly.

One of my notable accomplishments in this field is my successful leadership of two teams of web developers and my ability to prototype an average of 30 new product features per year. I have also been able to significantly improve the user experience of websites through my work, raising UX scores by 35%. In addition, I have mentored 18 employees in best practices and have contributed to cost and rework reductions of 12% and 18%, respectively.

Some challenges I have faced in my role as a web developer include managing the web development process, ensuring browser and platform compatibility, designing effective user interfaces and user experiences, optimizing website performance and speed, and integrating with third-party platforms and services.

PROJECTS
