[https://apps.shopify.com/courierx-2?surface\\_detail=courierx&surface\\_inter\\_position=1&surface\\_intra\\_position=1&surface\\_type=search](https://apps.shopify.com/courierx-2?surface_detail=courierx&surface_inter_position=1&surface_intra_position=1&surface_type=search)

Develope shopify public app for CourierX (Courier Company Pakistan). Developed in php, fully api based.

### Printing Daddy

<https://theprintingdaddy.com/>

In this project I did multi-tasks like Preparing Products in Photoshop, Data entry, Products uploading, use SEO Tools & worked on the theme also.

### M.H. Feeds

<http://mhenterprises.com.pk/>

This was my first Project handed to me after learning HTML, CSS, Bootstrap & Photoshop. In this project I customize the theme from the front end, I used Bootstrap and HTML, CSS to make it looks beautiful. Most of the images are customized by me. I use Photoshop to make blurry images clear and also give them a suitable background with shadow.

## Tailor Bazar

<https://tailorbazar.com/>

Tailor Bazar was the project in which I worked as Web Master, WordPress Theme Editor, Worked in the Core PHP of the WordPress, Also work on the Short Codes, Hooks of WordPress & Prepared a custom Plugin to Make PDF for Order data.
