

OBJECTIVE

I am confident in my ability to design and develop innovative solutions that meet and exceed customer expectations. As a collaborative team player, I look forward to working with cross-functional teams to ensure the timely delivery of quality software products."

EXPERIENCE

Eracon Technologies

2021 - 2022

PHP Developer intern

EDUCATION

Riphah International University Islamabad

2023

BS Software Engineering

PROJECTS

Save Life

During my final year of BSSE, I have designed a comprehensive project on "Save Life," a web-based blood donation system. The project aimed to develop a user-friendly platform for blood seekers or individuals in need of blood.

To achieve this, I designed and implemented a database system to store and manage blood bank data, and developed a user interface using to allow users to interact with the system. I also conducted user testing to ensure the system was intuitive and easy to use.

Throughout the project, I demonstrated strong problem-solving skills, attention to detail, and the ability to work both independently and collaboratively with a team. As a result of the project, I was able to successfully develop and deploy a fully functional blood donation system, which has the potential to save lives by facilitating more efficient blood donations and deliveries.

Overall, the project was an excellent opportunity to apply and further develop my skills in database management, software development, and project management

ACHIEVEMENTS & AWARDS

Certification from codeweaver in basics of python

Certification from Coursera in mobile app development
