Full Stack Developer with more than two years of experience building performant and scaleable web applications and microservices. I have worked with LAMP tech stack (PHP & Laravel).

I'm fluent in English, Urdu & Punjabi and have excellent communication skills.

Education

Graduate in Software Engineering (BSSE)
International Islamic University Islamabad - Islamabad
September 2019 to Present

Skills

- Laravel (1 year)
- RESTful API development (6 months)
- PHP 8+ (1 year)
- SQL databases (2 years)
- CSS [SCSS & Bootstrap] (3 years)

Work Experience

- **Junior PHP Developer**
  Zinlab Technologies - Islamabad
  Aug 2020 to June 2022

- **Assistant Store Manager**
  Medbazar - Islamabad
  May 2020 to Aug 2022

Projects

- Repo
  Repo is a custom-built CMS built in Laravel 8. Made on demand for major sites with performance and scalability in mind.

  I was responsible for developing the CMS and creating RESTful APIs to fetch content from the database for the front-end views.

- Learn IT

  A rival startup of Educative Inc, required a distance learning management system with video feeds, text & images.

  I was responsible for the development, testing, deployment, and maintenance of the Project.

- Merijaga

  A complex network of spacing & warehousing renting solutions with an integrated inventory management system.

  I was responsible for the development & communication with clients.

- MedBazar

  MedBazar is an E-commerce store for Medicine. I was involved in its development via Shopify, design, testing, SEO & Marketing.

  MedBazar was an early-stage startup.
