EDUCATION

Software Engineering
NED University of Engineering and Technology Karachi

11/2017 - 10/2021   *CGPA: 3.46*

UNIVERSITY PROJECTS

Blockchain Based Digital Immunity Passport (Final Year Project) (11/2020 - 08/2021)
- ReactJs | React Native| Nodejs | MySQL | Blockchain
- Our application is a contribution towards the solution of the consequences raised due to the recent Covid-19 pandemic and will also contribute towards making the world a healthy and safe place with no fake records and fraudulent reports. The purpose of blockchain based app was to verify vaccine certificate, eliminate human verification and digitize the process.

Beauty Salon Website (03/2020 - 06/2020)
- HTML | CSS | JavaScript | Bootstrap
- Developed a website for a beauty salon to enable online shopping of salon's products that included variety of beauty/ cosmetic treatments, courses and services like professional hair cutting and styling, manicures, pedicures and makeovers. UI was also developed as a deliverable.
